MEMORANDUM FOR PRS (Gentraeter/In-House Publication)

FROM: PROI (TI) (STINFO)

16 June 1999

SUBJECT: Authorization for Release of Technical Information, Control Number: AFRL-PR-ED-TP-FY99-0135

C.T. Liu, "Predicting Crack Growth in a Filled Polymeric Material"

1999 ASME Summer Conference Presentation

(Public Release)

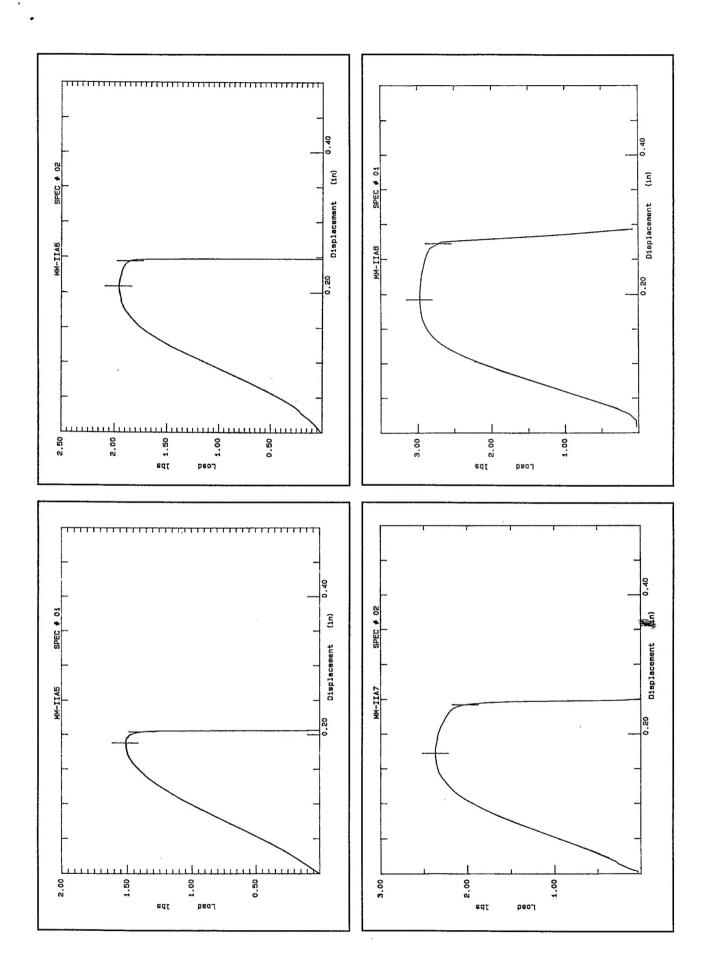

Predicting Crack Growth behavior in a Filled Polymeric Material

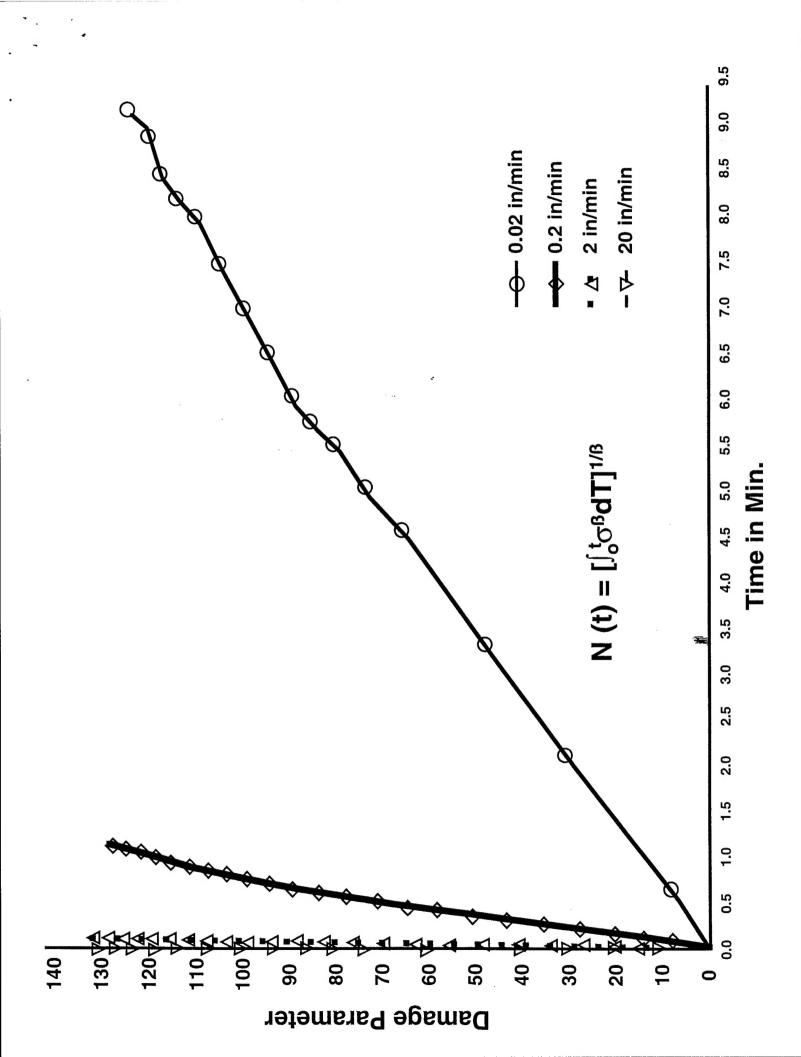

C. T. Liu
Air Force Research Laboratory
OL-AC AFRL/PRSM
10 E. Saturn Blvd.
Edwards AFB CA 03524-7680

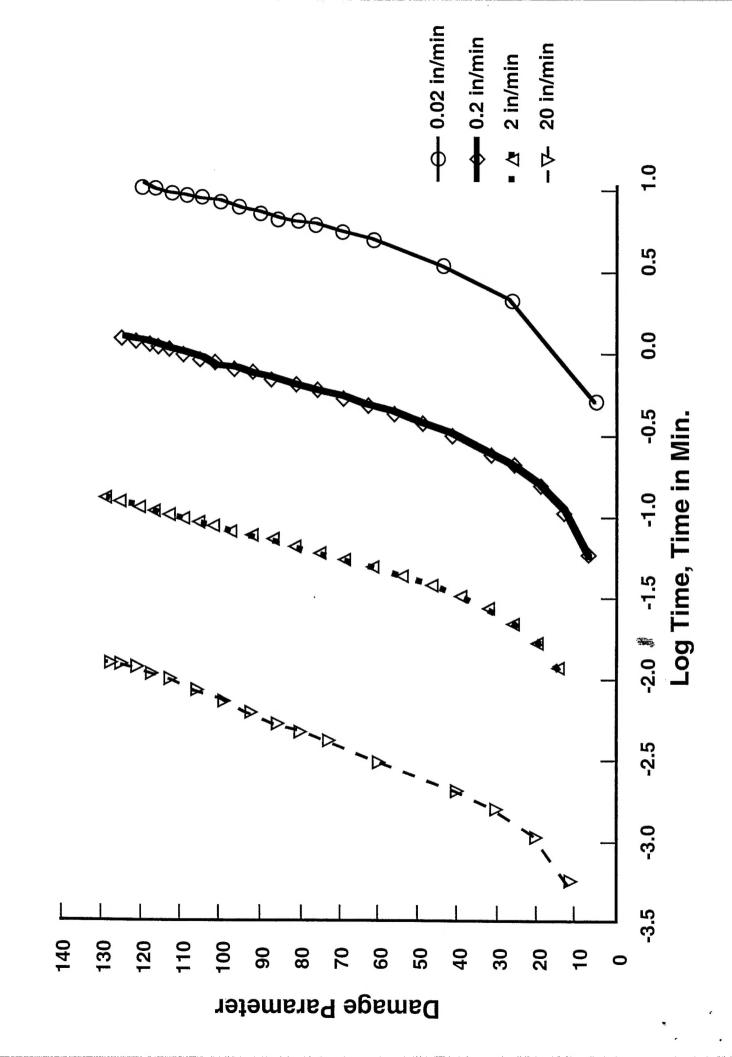

Objectives

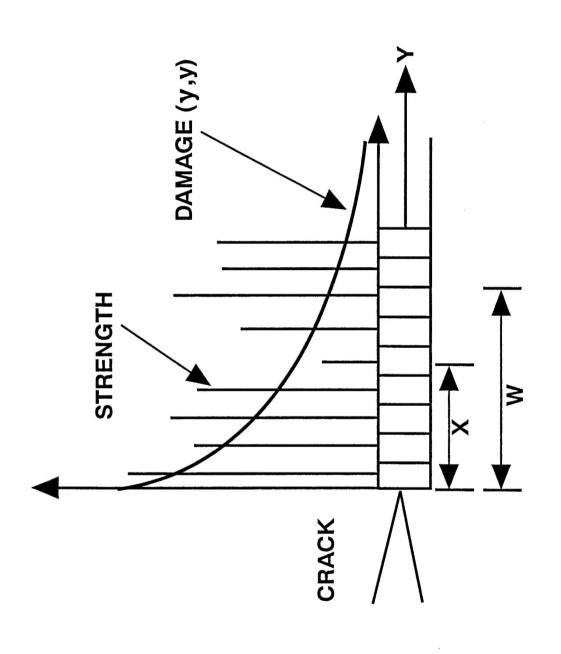

Predict the Crack growth Behavior at different Strain Rates.

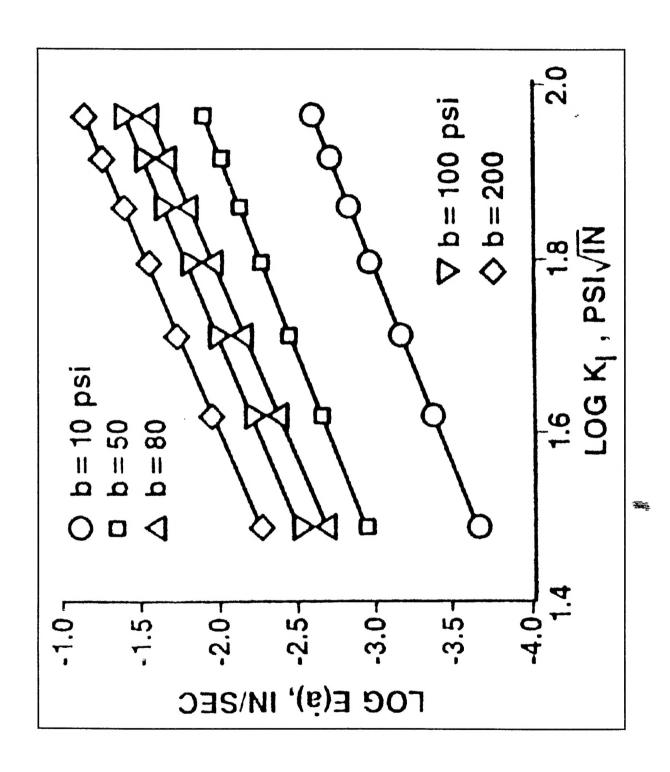

Investigate the Sensitivity of the Crack Growth Rate to the Variation of the Parameters in the Crack Growth Model.

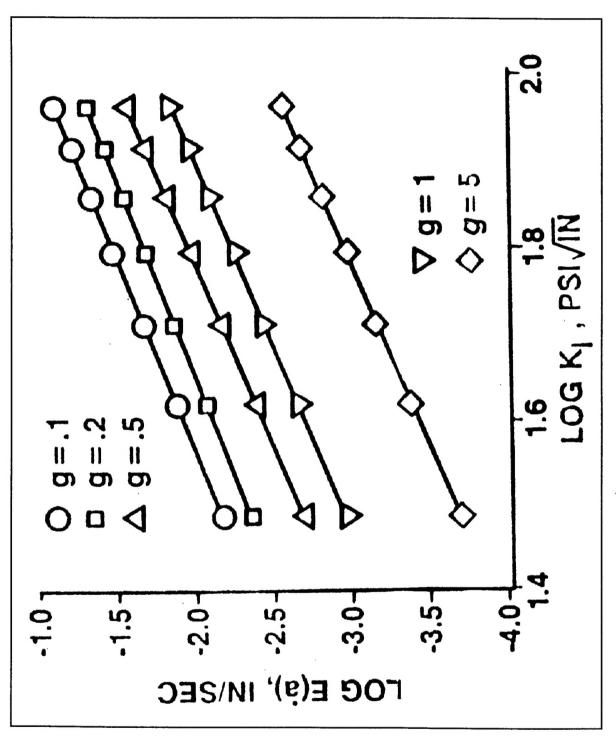

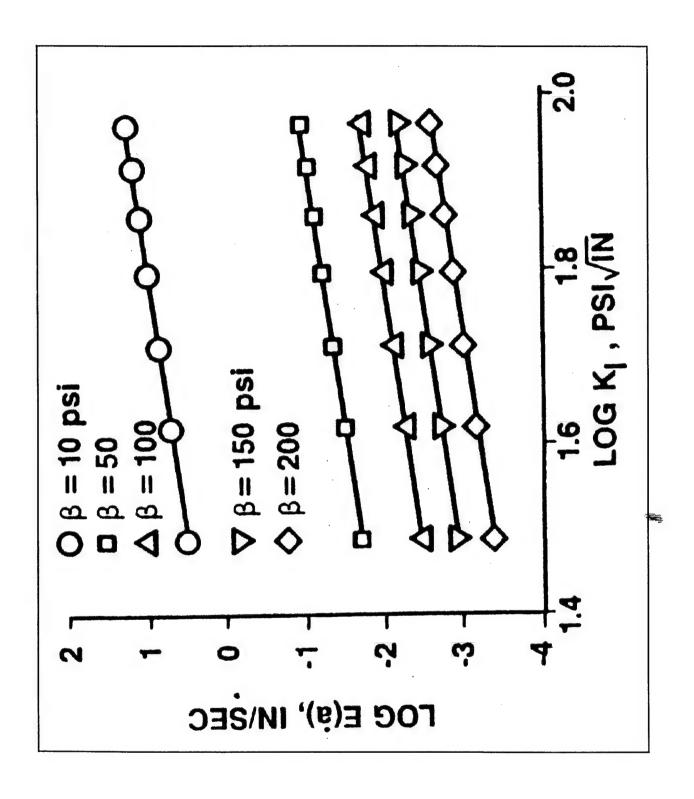

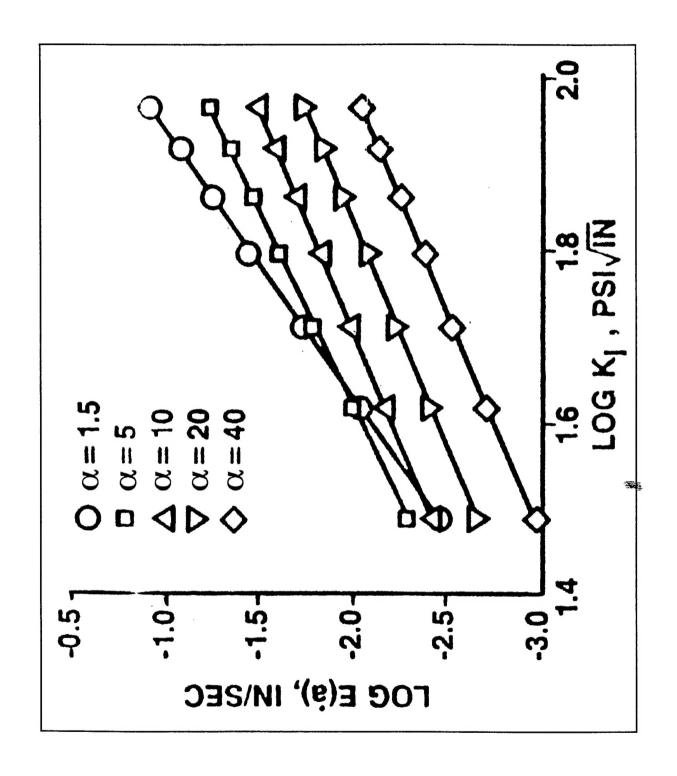

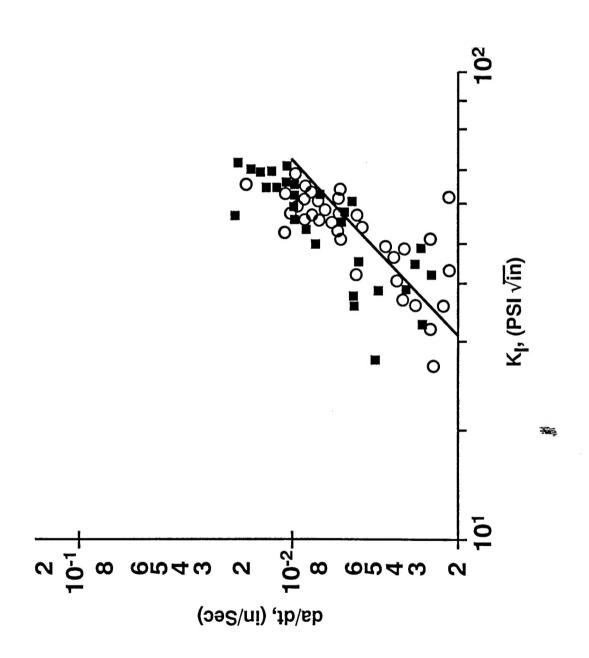

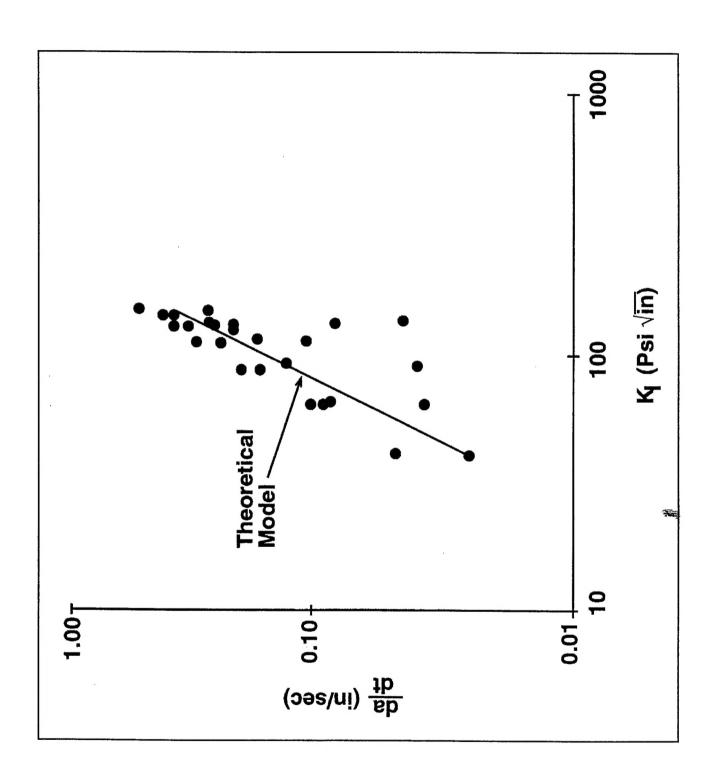

Conclusions

- 1. The Crack Growth Model can be Used to Predict Crack growth Rate at Different Strain Rates with Good Accuracy.
- 2. Among the Parameters in the Crack Growth Model, the Characteristic Value of the Strength, ß, has the Greatest Effect on the Crack Growth Rate.
